WHAT IS THE 'ELECTRIC BRAIN FESTIVAL'?

In Mandarin the word for computer translates literally as 'electric brain' so we're really talking about a computer festival. During terms 2&3 years 5-7 will create songs, videos, games and all kinds of other electronic creations to share with the whole school and maybe even the world!

WHAT DO I NEED TO DO?

Decide if you want to work by yourself, in a pair or in a group (4 people max). You then have to come up with an idea and share it with Mr Bengner in Chinese class. After your idea is approved you can start planning.

ARE THERE ANY RULES?

Yes. Whatever you make has to be completely in Chinese. It sounds hard but we have the mighty Whopper to help us as well as all the other things we learn in class. There are also different levels of challenge for each year level.

SOUNDS GREAT! WHEN DO WE START?

Mr Bengner will let you know in class when your group can start but you can start developing your idea whenever you like!
